## (54) INFORMATION COMMUNICATION EQUIPMENT

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide an information communication equipment capable of transmitting facsimile encoded data without activating a software for a facsimile protocol even when an opposite party is busy.

**SOLUTION:** An original set to a read part 18 is read, image data are generated and the image data are converted to the facsimile encoded data (MH, MR and MMR, etc). In a ROM 15, a PPP(point-to-point protocol) TCP/IP and an electronic mail software, etc., are stored. A control part 15 executes such a software, accesses the internet, attaches the facsimile encoded data to electronic mail and sends them out. Also, at the time of the attachment, header information for indicating that attached data are the facsimile encoded data is added to the electronic mail.
